SKILLS

Solidity	jQuery
Web3.js	Bootstrap
Ethers.js	SQL
Javascript	HTML5
ReactJS	CSS3
Python	Git

TOOLS

Truffle	Metamask
Hardhat	Remix IDE
Infura	Alchemy
VS Code	Ganache

PROJECTS

EVM based Staking Dapp

Developed an EVMOS-style dapp with inheritable smartcontract in Solidity that rewards stakeholders with tokens & allows withdrawals. Compiled and debugged with Truffle and Chai

Uniswap Inspired Frontend

Implemented an alternate frontend interface for the swapping function of Uniswap using ReactJS, Material-UI and the EthersJS module to connect to the blockchain via metamask

ERC-20 Token

Created my own ERC-20 token using Openzeppelin and deployed the contract on Rinkeby testnet using Hardhat

Multi-User Django Blog

Developed a multiple user blog application in python where users can create & delete posts, and update their profiles. Django ORM was used to query the database & filter results

Goodreads Quotes Scrapper

Created a python script that scrapes the quotes from a specified author and saves the quote & book title in CSV

TMDB Movie Website

Built a website, using the API of TMDB, where users can search for a movie and view its overview, poster and TMDB rating

EDUCATION

JNU, New Delhi · B. Tech, Chem. Engr. 2020-24

CGPA: 8.87/10

Governor at JNU Hack Club · 2022-23

ACHIEVEMENTS

AIR 3 in 10th National Cyber Olympiad · Jul 2018

KVPY Fellowship - Issued by DST, Govt of India · Feb 2019

NTSE Scholarship - Issued by NCERT · Jan 2018
